

A leading food producer with a passion for sustainable development

We take pride in our work and the quality of our products. We produce everything from genetically modified, GMO, crops, to non GMO and even organic products. We rotate crops and run a sustainable business, keeping more than 40% of our land as an ecological reserve. No rain forest was cut down for our farms. We use scientific as well as old and proven methods. Our managing farmers are agronomists.

When we make a promise, we keep it. We deliver quality products with diligence, always on time. We desire close and long term relations with our clients, and deal as directly as possible with the end client.

The people in our company are highly qualified and educated. We have expertise in agronomy, sales, marketing, finance, business administration, project management, consultancy and information technology.

Brazilian producer of food

We are a producer of food and feed. We are the fortunate owners of 350,000 hectares of some of the best land for agriculture in Tocantins, Maranhão and Bahia. We plant and harvest products such as soybeans and corn as well as other crops on a number of farms. We have a large capacity and prefer to work directly with end clients. We have all the necessary know-how of planning, production, shipping and international finance.

PRIMAVERA

PRIMAVERA

At Primavera all employees are proud of being known for helpfulness and professionalism. We take pride in our work.

Primavera, a reference Brazilian food and feed producer

We really enjoy receiving visitors and meeting new people. Not only are we proud to show off our work, we are also continually looking for new business. We also strongly believe in face to face meetings. So we are grateful whenever we are contacted.

Our company

This is a brief introduction to our company Primavera, Importação e Exportação de Cereais Ltda, but we prefer just to be called Primavera.

We are a Brazilian food producer with origins back to 1950. The current company construction is around 13 years old. Presently we have our main office in Brazil in Palmas, Tocantins and affiliate offices in Canada, Denmark and the Middle East.

The company is the owner of 350,000 hectares of prime land divided on a number of farms.

Tocantins

The land is principally in the Brazilian State of Tocantins but also in the State of Bahia and Maranhão. Tocantins is the most recent State in Brazil and is only 25 years old. It has a huge growth potential and is indeed one of the fastest growing areas of Brazil. It has a modern infrastructure and a very business friendly State government.

Principals

Our Administrative Director, Mr. Moacir Vieira de Almeida is an agronomic engineer and pioneer in the State of Tocantins concerning soybean production. In fact, Primavera is considered as one of the companies with most knowledge in this area. We are three company principals with specialist knowledge in diverse fields such as business management, economy, international finance, agronomy and information technology.

Business

Soybeans is our major crop but we also produce other crops such as yellow corn. Our potential production capacity of soybeans is 1,000,000 metric tons a year.

We can increase this production capacity by using a network of over 30 other producers, all organized under Primavera.

Our primary business is exporting directly to clients outside of Brazil. We prefer long term relationships and guarantee a quality product delivered in accordance to agreement and of course on time.

Tocantins, Brazil

It may not be paradise, but at times we forget. Tocantins is the newest federal State in Brasil. It has great beauty that must be seen to be believed. Most of our land is in Tocantins, and this is where we are headquartered. As a new State the growth is phenomenal. This is one of the most dynamic places on Earth.
